# ALI HAMZA

Senior Full-Stack Engineer | PHP/Laravel | React | SaaS Architecture

hello@alihamza.dev | +92 305 9042500 | Lahore, Pakistan (UTC+5)
alihamza.dev | linkedin.com/in/alihamzadev | github.com/alihamzahq

## PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 7+ years of experience building Laravel, React, and Inertia.js applications, scalable SaaS platforms, REST APIs, and multi-tenant systems. Reduced server costs by approximately 40% through MySQL optimization and caching, and reduced response times for key APIs by 60%. Lead an eight-member engineering team delivering real-time integrations, reliable background processing, and production web applications.

## KEY ACHIEVEMENTS

- Reduced server costs by approximately 40% through MySQL query optimization, indexing, Redis caching, and Cloudflare caching.
- Scaled real-time sports data delivery across 100+ tenant sites with sub-second latency
- Reduced response times for key APIs by 60% (500ms to 200ms) through MySQL query optimization, indexing, and Redis caching.
- Led 8-engineer team delivering scalable multi-tenant SaaS platform

## TECHNICAL SKILLS

| | |
|---|---|
| **Backend** | PHP, Laravel, REST APIs, API Integration, Authentication, Queue Management (Laravel Horizon) |
| **Frontend** | JavaScript (ES6+), React.js, Vue.js, Inertia.js, Tailwind CSS |
| **Database** | MySQL, Redis, MongoDB, Database Design, Query Optimization, Database Indexing, Caching Strategies |
| **DevOps** | Docker, CI/CD Pipelines, Linux, Nginx, AWS (S3), GCP (Application Deployment), Cloudflare, SSL Automation |
| **Tools** | Git, Postman, Jira, Slack, Claude Code, Cursor, New Relic APM |
| **Integrations** | Stripe (Subscriptions/Billing), Firebase (Push Notifications/Chat), Socket.io, OpenAI API |

## WORK EXPERIENCE

### Full Stack Developer | Team Lead

April 2023 – Present

**Sixlogics** • Lahore, Pakistan

**iPublisher — Multi-Tenant SaaS Platform** — *Laravel, Inertia.js, React, OpenAI API, Redis, MySQL, Socket.io*

- Architected a multi-tenant SaaS platform serving 100+ clients; automated tenant domain provisioning using Cloudflare DNS, SSL certificate management, and Nginx configuration.
- Reduced OpenAI API costs by 70% through optimized token usage, cost-aware model selection, and prompt refinements.
- Reduced response times for key APIs by 60% (500ms to 200ms) through MySQL query optimization, indexing, and Redis caching; used New Relic APM to investigate performance bottlenecks.
- Designed and implemented disposable testing environments for 13 databases (one central, one tenant, and 11 sports databases), isolating test execution and tearing down environments afterward.
- Deployed Laravel applications to GCP-hosted infrastructure through existing deployment workflows and supported production troubleshooting.
- Scaled real-time sports data delivery across 100+ tenant sites with sub-second latency using Socket.io and Redis Pub/Sub
- Eliminated recurring queue failures by designing a multi-queue architecture using Laravel Horizon with Redis-backed job prioritization, retry strategies, and real-time monitoring

- Led 8-member cross-functional team, managing client communication and project delivery across multiple countries

**SwapSeat — Real-Time Ticket Exchange Platform** — *Laravel, Stripe, Firebase, MySQL, REST APIs*

- Built football ticket exchange system with real-time sports data integration and live match updates
- Integrated Stripe for subscription billing with full lifecycle management (webhooks, invoicing, payment methods)
- Implemented Firebase Cloud Messaging for push notifications and real-time chat for ticket negotiations

### Full Stack Developer

June 2021 – April 2023

**Friday Media Group** • Lahore, Pakistan

**HelloFriday — SaaS HR Management Platform** — *Laravel, Inertia.js, React, MySQL, REST APIs*

- Automated attendance tracking and performance workflows, cutting HR workload by 40%
- Boosted employee retention 30% with React dashboards for KPI and leave analytics
- Cut HR processing time by 55% by migrating to modular Laravel/Inertia.js architecture

**VExpo — Scalable Virtual Event Platform** — *Laravel, React, MongoDB, MySQL, WebSockets*

- Reduced API latency by 65% through Redis caching, MySQL optimization, and Laravel queue-based processing improvements.
- Boosted exhibitor engagement by 45% with 3D virtual booths and live Q&A via WebSockets

### Laravel Developer

Nov 2019 – April 2021

**Sentax Lab** • Gujranwala, Pakistan

- Developed web applications across eCommerce, college management systems, and ERP solutions using Laravel and CodeIgniter
- Designed RESTful APIs, optimized MySQL queries, and implemented authentication and security features
- Collaborated with cross-functional teams to deliver scalable codebases across 10+ client projects

### PHP Developer

Aug 2019 – Nov 2019

**VNext Solution** • Gujranwala, Pakistan

- Started as PHP intern, promoted to full-time developer within 3 months based on performance
- Built foundational skills in PHP development, MySQL database management, and web application best practices

## EDUCATION

### Bachelor of Science in Computer Science (BSCS)

**Virtual University of Pakistan**

*Completed 2026*

*Credit transfer based on prior Associate Degree studies completed in 2019*

### Web Design & Development Certifications

2016 – 2018

**Aptech Computer Education, Gujranwala**
