Full-Stack Developer | 6+ Years | PHP, Laravel, JavaScript (React/Vue/Inertia.js) Specialized in building scalable **SaaS platforms** and **high-traffic web applications** with a proven track record of reducing operational costs by 70%+, improving system performance by **60%**, and leading cross-functional teams to deliver enterprise-grade, **AI-enhanced solutions**.

- **Technical Leadership:** Led an 8-member team at Sixlogics to architect a **multi-tenant SaaS platform (Laravel/Next.js)** serving **100+ clients**, automating deployments (**CI/CD on AWS & GCP**) and cutting setup time by **85%** using **AI-assisted development tools (ChatGPT, Cursor AI, Claude)** while maintaining effective communication with clients throughout project lifecycles.
- **Cross-Industry Impact:** Delivered **15+ full-stack projects (CMS, eCommerce, HRM)** using **PHP, React, and Inertia.js**, optimizing workflows, enhancing system efficiency, and improving user experience through real-time data integration and seamless payment processing.
- **Key Strengths:** **Full-stack development (PHP/Laravel, React), SaaS architecture, cost & performance optimization, CI/CD automation (AWS/GCP), AI-assisted coding, client communication,** and cross-functional leadership.

Education

- Apr 2017 - May 2019
- **Bachelor's degree, Computer Software Engineering**
Virtual University of Pakistan
- Oct 2016 - Dec 2018
- **Web Design & Development Certifications**
Aptech Computer Education, Gujranwala

Work Experience

- Apr 2023 - Present
- **Full Stack Developer | Team Lead**
Sixlogics, Lahore, Punjab, Pakistan
- Key Projects:**
- iPublisher:** Multi-Tenant SaaS Platform with AI & Live Sports Integration
- Technologies:** Laravel, Inertia.js, React.js, OpenAI API, Redis, MySQL, Nginx, Socket.io
- Description:** A multi-tenant platform enabling users to create **custom websites** with automated DNS, Cloudflare, Nginx, and SSL setup. Includes a central CMS and tenant-specific admin panels for content management. Features OpenAI API-powered article rewriting and real-time sports data integration (e.g., football, cricket, basketball) based on tenant preferences.
- Achievements:**
- Reduced **OpenAI API costs 70%** through optimized token usage, model-selection strategies (GPT-4 Mini), and prompt-engineering refinements.
 - Improved **system performance by 60%** with MySQL query tuning, Redis caching, and Laravel code refactoring.
 - Automated **CI/CD pipelines and multi-cloud deployments (AWS/GCP)** for scalable, cost-efficient releases.
 - Scaled real-time sports updates to **10K+ concurrent users** using Socket.io + Redis Pub/Sub.
 - Achieved **99.9% queue reliability** by rebuilding Laravel Horizon

Jun 2021 - Apr 2023

- workflows with Redis prioritization + auto-failure handling.
- Enhanced **SEO and UX** via tenant CMS with meta-tag, sitemap, and structured-data automation.
- Leveraged **AI-assisted coding (ChatGPT, Cursor AI, Claude)** to speed delivery and maintain accuracy, while ensuring effective **client communication** across projects.

SwapSeat: Real-Time Ticket Exchange Platform

Technologies: Laravel, Stripe, Firebase, MySQL, REST APIs

Description: A football ticket exchange system with real-time sports data, live match updates, and secure ticket trading for registered companies.

Achievements:

- Enhanced ticket exchange and engagement with **real-time football data** and **Firebase** chat for seamless negotiations.
- Boosted subscription conversions by optimizing **Stripe integration** for secure, efficient, high-volume ticket exchanges via API/CMS.

Full Stack Developer

[Friday Media Group, Lahore, Punjab, Pakistan](#)

Key Projects:

HelloFriday: SaaS HR Management Platform

Technologies: Laravel, Inertia.js, React.js, MySQL, REST APIs, Workflow Automation

- Automated attendance tracking and performance workflows, cutting HR workload **40%**.
- Boosted retention **30%** with React dashboards for KPI/leave analytics.
- Cut HR processing time **55%** by migrating to modular Laravel/Inertia.js architecture.

VExpo: Scalable Virtual Event Platform

Technologies: Laravel, React.js, MongoDB, MySQL, WebSocket

- Ensured **99.9% uptime** and optimized real-time interactions by reducing API latency **65%** through Redis caching, MySQL optimizations, and Laravel queues.
- Boosted exhibitor engagement **45%** with 3D booths and live Q&A via WebSockets.

Nov 2019 - Apr 2021

Laravel Developer

[Sentax Lab, Gujranwala, Punjab, Pakistan](#)

Technologies: CodeIgniter, Laravel, JavaScript, jQuery

Contributed to projects across **eCommerce, college management systems, ERP solutions, and portfolio websites**, gaining experience in **web application development, RESTful API design, MySQL optimization, authentication & security implementation, UI/UX improvements, and cross-functional collaboration** to ensure scalable and maintainable codebases.

Aug 2019 - Nov 2019

PHP Developer

[VNext Solution, Gujranwala, Punjab, Pakistan](#)

Began as a PHP intern, progressing to a full-time **Web Developer**.

Skills

PHP | Laravel | JavaScript | React.js | Vue.js | Inertia.js | MySQL | Redis | REST APIs | Tailwind CSS

Dev Tools

Git, Docker, CI/CD, VS Code, Postman, Jira, Figma, Linux, Cloudflare, Nginx, ChatGPT, Claude, Cursor AI
